License Part Number Changes

Overview:

As Honeywell Scanning & Mobility (HSM) integrates legacy systems and policies, some part numbers require an adjustment in order to be incorporated into the HSM ERP software.

Flexible Licensing Solution (FLS) and EasyID™ licenses have been identified as a group of part numbers that require modification to conform to Honeywell Scanning & Mobility guidelines. These part number changes will be effective immediately.

Additional Information:

FLS is a licensing feature that allows customers to buy the capabilities they need today and be protected for their needs in the future. EasyID™ is a TotalFreedom™ plug-in that simply, quickly and effectively parses United States Driver's Licenses and Military ID cards. Licenses can be ordered by your regional Customer Service, similar to other products.
